UPFRONT
POS SOFTWARE SOLUTIONS

Your store, running upfront.

Point of sale for independent grocers. Scanner, register, payments and back office from one team, from one lane to every store you own.

THE LANE

Everything a lane needs, installed and supported by one team.

15.6" dual-display terminal

Zebra bioptic scanner scale

Ingenico Lane/5000

Epson thermal printer

PAYMENTS

Every payment, one pinpad.

Every card, benefit and phone your shoppers carry is accepted on the same Ingenico Lane/5000 at the lane. No second device, no extra steps for the cashier.

Debit · Credit · EBT Food Stamps · eWIC · OTC · Apple Pay · Google Pay

Delivery integrations: Instacart · Uber Eats · Mercato

Direct to the processor

Our own transaction engine connects to the major credit card processors. No middleware fees, one less thing to break.

Certified in every state

Integrated and certified for eWIC, SNAP and paper WIC programs across all US states.

Secure by default

EMV chip and PCI / PA-DSS standards keep card data protected at every lane.

BACK OFFICE

The back office runs the front.

Prices, promotions and labels are set once in the back office and sent to every lane and every store.

Labels and shelf tags

Export labels straight from the pricebook. Items on promotion come out ready to tag the shelf.

One office, many stores

Maintain items and prices on a remote server and send them to each store: new items, removals and scheduled price changes.

Your sales on your phone

UpfrontPOS Cloud shows sales, transactions and reports for every store, live, on iPhone.

Also included: Warehouse interface · Fully integrated receiving · Portable data terminal · Cashier performance · Electronic journal · tLog extraction

APPS

Upfront Store Dashboard

Real-time sales, clear reports and the price book in your pocket. Connected straight to your UpfrontPOS.

Upfront Shopper

Points on every purchase, your offers and weekly ads, and a member card on their phone. All of it comes from your UpfrontPOS.

AppCard

UpfrontPOS integrates with AppCard, the rewards platform used by more than 3,300 independent grocers. Shoppers join at the lane, clip digital coupons and get automated marketing, and your cashiers keep ringing up the same way.

WHO IT IS FOR

Independent supermarkets

Fast lanes with the scale in the scanner, SNAP and eWIC on every register, and price changes that reach every lane at once.

Multi-store groups

One back office for every location: a shared pricebook, store-by-store reports and every store live on the owner's phone.

Bodegas and convenience

One compact lane that rings up, takes every card and benefit, and closes the day without a second system.

Meat, produce and specialty

Weighed items, shelf labels and department reports for fresh, plus promotions like Pick 5 and mix and match.

SUPPORT

Service when you need it

Qualified technicians by phone, mobile and remote connection, on time and with a quick turnaround.

Remote access

We connect to your server and registers to fix problems without a visit.

911 replacement

Rapid hardware replacement to keep a lane from staying down.

On-site service

Local technicians for installation, training and hardware repair.

Talk to us

Tell us about your store and we will set up a demo with the equipment you use.
